DATE MAILED: 08/21/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.		Applicant(s)	
	10/510,612		ASA, YUKIHIRO	
	Examiner		Art Unit	
	Travis M. Reis		2859	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) 4-9 is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☒ Claim(s) 4-9 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 06 October 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

1. Claims 4-9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-9 have not been further treated on the merits.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kienle (U.S. Patent 3987551) in view of Nishimura et al. (U.S. Patent 6604295).

Kienle discloses a touch sensor comprising a first coupling member (1) constructed in a united manner with a pedestal, plate springs (2, 2', 3, 3') arranged to be parallel to each other, one end of the plate springs being fixed to the first coupling member, a second coupling member means (5, 4) to couple the plate springs to each other, a plate (9) installed in a manner that a side of the plate springs corresponds to a side of the plate, a pipe (8) mounted to each plate spring, and detecting means (10,11) for detecting a displacement of the plate caused by external force applied to the pipe, where each plate spring has a rigid part at the base of connection and an elastic part on the sides; an elastic body (15) to cancel the effect of gravity; and a supporting member (12) having one end fixed to the coupling member and an adjusting member (14) for adjusting the distance between the supporting member and the pedestal (Figures 3-5).

Kienle does not disclose the plate is a magnet.

Nishimura et al. discloses a microscopic geometry measuring device wherein a magnet (72) is used to provide accurate movement data to detecting means (73) in order to measure displacement (Figure 7). Therefore, it would have been obvious to one with ordinary skill in the art at the time of the invention was made to magnetize the plate disclosed by Kienle as taught by Nishimura et al. in order to gather more accurate readings from the detecting means.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schoof discloses a gauge (U.S. Patent 2018384). Emery et al. discloses a gauging apparatus (U.S. Patent 2047408). Neuer et al. discloses a universal multi-coordinate sensor (U.S. Patent 3869799). Berchtold discloses a differential Hall-effect gear measure feeler (U.S. Patent 4703261). Asakawa discloses a force controlling system (U.S. Patent 5012591). Ulbrich discloses a probe (U.S. Patent 5154002). Ruck et al. discloses a probe head (U.S. Patent 5623766). Hidaka et al. discloses a touch signal probe (U.S. Patent 6516529). Takai discloses a measuring head (U.S. Patent 20040255703). Kassai et al. discloses a measurement probe (U.S. Patent 7065893). Yamamoto et al. discloses a scanning probe (U.S. Patent 7076883).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Travis M. Reis whose telephone number is (571) 272-2249. The examiner can normally be reached on 8--5 M--F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez can be reached on (571) 272-2245. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished
